

# Logic Model: C&FS Clinic

Goal: Promote recovery, improve functioning/coping skills, maintain/increase healthy relationships

Inputs are resources a program has available or may need to ensure program goals are met.

Activities are intentional actions that are necessary to achieve program goals.

Outputs are the direct results of program activities.

Outcomes are the changes in program participants' behavior, knowledge, or skills.

These are long-term, systemic changes (overall functioning) that occur as a result of program activities and short-term outcomes.
